

Course Title: Microeconomics

Course Code: IL-C-104

Course Objective: This course aims to help students learn the fundamentals of economics and apply these concepts to their lives and to the world in which they live. Economic theory is only valuable and enjoyable if applied to understanding actual events in the energy sector and policies.

Course Outcome: By the end of the course, students will be able to apply microeconomic principles and models to define the rationality of decision making. It helps in decision making in order to achieve desired economic goals. It enhances the capability of participants to understand the general economic and business policy in totality and its impact on the energy sector.
