

Course Title: Intellectual Property Law
Course Code: IL-C-504

Course Objective: This course addresses the legal protection of intellectual property through trademark, patent, copyright. It introduces fundamental concepts of intellectual property rights to the students. It familiarizes them with the kind of intellectual property, rights, infringement, remedies and licensing regime associated with each intellectual property. Moreover, the students will be given basic knowledge about the international and national scenario and current legal trends relating to intellectual property.

Course Outcome: After the completion of the course, students will be able to:

1. Identify different types of Intellectual Properties (IPs), the right of ownership, the scope of protection as well as the ways to create and extract value from IP
2. have an understanding of the international scenario regarding the protection of Intellectual property
3. identify activities that constitute IP infringements and the remedies available to the IP owner and describe the precautions steps to be taken to prevent infringement of proprietary rights in products and technology development
